"S" IS FOR SERVICE

The dedicated service of Scottsville's teachers to develop pupils into broader and better citizens of the future was recognized and sincerely appreciated by all the students of Scottsville High School. During the school term we students were encouraged and prod-
ded to keep searching for facts, concepts, and ideas, and to use our special talents to the ut-
most extent.

Whether we become a secretary, mechanic, or professional, the principles and disciplines taught us by our teachers will always remain a part of us and our future life.

"S" IS FOR SPIRIT

We, as students of Scottsville High School, feel that spirit and enthusiasm should be a perpetual element of our school life. It is a reflection of the concentrated effort and hard work by each individual member of the student body, as well as the co-operative effort of a team.

Whether we attended athletic events, rode the school bus, attended club meetings, participated in assemblies, or represented the student body in contests or on official school trips, we had an opportunity to meet new and interesting people and to broaden our interests and knowledge and to grow into responsible adults.

Through laughing, studying, and playing together we have combined fun with work while we lived the best years of our life.

"S" IS FOR SOCIAL OPPORTUNITIES

Participating in club activities play an important role in the development of students today. Working together in an organization teaches us the fundamentals of co-operation and teamwork-- the art of giving of ourselves through service.

By planning programs and group activities, we were actually running small-scale businesses and governments. In the years to come, these activities will enable us as citizens to take a more active role in the life of the community in which we live.

"S" IS FOR SPORTSMANSHIP

As the scoreboard chalks defeat after defeat for Scottsville's Tigers, we had to try to realize that we learn by our mistakes and that each game would give us one more chance to show our fighting spirit and sportsmanship. It was also essential that we not brood over our errors or try to find a scapegoat for our shortcomings.

We were always proud of our Tigers, no matter what the score. The value of competition is always immeasurable, and the value of learning to stick with a tough job even more so.

THE MOON... *and beyond!*

Bright, new horizons await today's students . . . new technologies . . . new medicines . . . even the moon and whatever lies beyond.

How far today's students go in this space age depends partly on their imagination but primarily on their training. Conquering new horizons will demand more of today's graduates — more knowledge, more skills, more training and more specialization.

Our Free Enterprise system, with its high living standards, gives everyone an opportunity to "shoot for the moon" in any field. Whether or not our target is reached depends on how well trained we are to launch ourselves.
